

# DC52028 | MVL5

## Instructions for Use

MVL5 is a new Multivalent Cationic Lipid for siRNA Delivery. Improved total gene silencing and Lower non-specific gene silencing, Lower toxicity.

## Product information

| Chemical Name      | MVL5                                                                                                                                                                |
| Formula            | C59H116CL5N7O4                                                                                                                                                      |
| M.Wt               | 1,164.86185264587                                                                                                                                                   |
| Purity             | >98%                                                                                                                                                                |
| Storage            | Original product: up to 1 year under the storage conditions stated on the vial, kept tightly sealed. Stock solutions: aliquots at -20°C, generally up to one month. |
| Shipping condition | Ships from Shanghai. Pure lipid is stable during ice-pack transport.                                                                                                |

## Formulation & study context

Literature values apply to the cited study only. Administration routes describe research, not clinical instructions.

A complete product-specific formulation has not been verified. No standard ratio is substituted.

|                      |                                      |
|----------------------|--------------------------------------|
| N/P ratio            | Not reported in the verified record  |
| Cargo                | Not available in the verified record |
| Administration route | Not available in the verified record |
| Animal model         | Not available in the verified record |
| Formulation process  | Not available in the verified record |

N/P is a nitrogen-to-phosphate molar ratio. Lipid:cargo mass ratio is a different quantity and must not be used as N/P.

## Stock-solution preparation table

Calculated using product-page MW: 1164.86185264587 g/mol. Volumes are final solution volumes.

| Mass  | 1 mM      | 5 mM     | 10 mM    |
|-------|-----------|----------|----------|
| 10 mg | 8.585 mL  | 1.717 mL | 0.858 mL |
| 25 mg | 21.462 mL | 4.292 mL | 2.146 mL |
| 50 mg | 42.924 mL | 8.585 mL | 4.292 mL |

| Mass   | 1 mM       | 5 mM      | 10 mM     |
|--------|------------|-----------|-----------|
| 100 mg | 85.847 mL  | 17.169 mL | 8.585 mL  |
| 250 mg | 214.618 mL | 42.924 mL | 21.462 mL |

Volume (mL) = mass (mg) × 1000 / [MW (g/mol) × concentration (mM)]. Mathematical conversions only; not measured solubility. Confirm solvent compatibility and the exact material before preparation.

## Handling & storage

Provided that storage conditions are as stated on the product vial and the vial is kept tightly sealed, the product can be stored for up to 1 year.

Wherever possible, prepare and use solutions on the same day. If stock solutions must be prepared in advance, store them as aliquots in tightly sealed vials at -20°C. Generally, these will be usable for up to one month.

Before use, and prior to opening the vial, allow the product to equilibrate to room temperature for at least 1 hour.
