

DC60705 | FO-32

Instructions for Use

FO-32 is an artificial intelligence-guided designed ionizable lipid for RNA delivery to the muscle, lung and nose. FO-32 LNPs enable potent transfection throughout the whole ferret lung epithelium, from trachea to alveoli.

Product information

CAS No.	Not available
Chemical Name	FO-32
Formula	C62H111N3O8
M.Wt	1,026.6
Purity	98%
Storage	Original product: up to 1 year under the storage conditions stated on the vial, kept tightly sealed. Stock solutions: aliquots at -20°C, generally up to one month.
Shipping condition	Ships from Shanghai. Pure lipid is stable during ice-pack transport.

Formulation & study context

Literature values apply to the cited study only. Administration routes describe research, not clinical instructions.

A complete product-specific formulation has not been verified. No standard ratio is substituted.

N/P ratio	Not reported in the verified record
Cargo	Not available in the verified record
Administration route	Not available in the verified record
Animal model	Not available in the verified record
Formulation process	Not available in the verified record

N/P is a nitrogen-to-phosphate molar ratio. Lipid:cargo mass ratio is a different quantity and must not be used as N/P.

Stock-solution preparation table

Calculated using product-page MW: 1026.6 g/mol. Volumes are final solution volumes.

Mass	1 mM	5 mM	10 mM
10 mg	9.741 mL	1.948 mL	0.974 mL
25 mg	24.352 mL	4.870 mL	2.435 mL
50 mg	48.704 mL	9.741 mL	4.870 mL

Mass	1 mM	5 mM	10 mM
100 mg	97.409 mL	19.482 mL	9.741 mL
250 mg	243.522 mL	48.704 mL	24.352 mL

Volume (mL) = mass (mg) × 1000 / [MW (g/mol) × concentration (mM)]. Mathematical conversions only; not measured solubility. Confirm solvent compatibility and the exact material before preparation.

Handling & storage

Provided that storage conditions are as stated on the product vial and the vial is kept tightly sealed, the product can be stored for up to 1 year.

Wherever possible, prepare and use solutions on the same day. If stock solutions must be prepared in advance, store them as aliquots in tightly sealed vials at -20°C. Generally, these will be usable for up to one month.

Before use, and prior to opening the vial, allow the product to equilibrate to room temperature for at least 1 hour.
