

DC65349 | ALC-0315 analgous-3

Instructions for Use

ALC-0315 analgous-3 is an butanolamine ionizable lipid with both ester bonds located adjacent to C8 relative to the amine head. The introduction of ester linkages can improve the clearance of the lipid in the liver. This compound is analgous to ALC-0315.

Product information

CAS No.	Not available
Chemical Name	ALC-0315 analgous-3
Formula	C ₁₉ H ₁₇ CIN ₂ O ₃
M.Wt	356.81
Purity	ELSD-HPLC>95%
Storage	Original product: up to 1 year under the storage conditions stated on the vial, kept tightly sealed. Stock solutions: aliquots at -20°C, generally up to one month.
Shipping condition	Ships from Shanghai. Pure lipid is stable during ice-pack transport.

Formulation & study context

Literature values apply to the cited study only. Administration routes describe research, not clinical instructions.

A complete product-specific formulation has not been verified. No standard ratio is substituted.

N/P ratio	Not reported in the verified record
Cargo	Not available in the verified record
Administration route	Not available in the verified record
Animal model	Not available in the verified record
Formulation process	Not available in the verified record

N/P is a nitrogen-to-phosphate molar ratio. Lipid:cargo mass ratio is a different quantity and must not be used as N/P.

Stock-solution preparation table

Calculated using product-page MW: 356.81 g/mol. Volumes are final solution volumes.

Mass	1 mM	5 mM	10 mM
10 mg	28.026 mL	5.605 mL	2.803 mL
25 mg	70.065 mL	14.013 mL	7.007 mL
50 mg	140.131 mL	28.026 mL	14.013 mL

Mass	1 mM	5 mM	10 mM
100 mg	280.261 mL	56.052 mL	28.026 mL
250 mg	700.653 mL	140.131 mL	70.065 mL

Volume (mL) = mass (mg) × 1000 / [MW (g/mol) × concentration (mM)]. Mathematical conversions only; not measured solubility. Confirm solvent compatibility and the exact material before preparation.

Handling & storage

Provided that storage conditions are as stated on the product vial and the vial is kept tightly sealed, the product can be stored for up to 1 year.

Wherever possible, prepare and use solutions on the same day. If stock solutions must be prepared in advance, store them as aliquots in tightly sealed vials at -20°C. Generally, these will be usable for up to one month.

Before use, and prior to opening the vial, allow the product to equilibrate to room temperature for at least 1 hour.
