

DC67464 | CP-LC-1074

Instructions for Use

CP-LC-1074 is a homocysteine-derived ionizable cationic lipid that enables highly efficient in vivo delivery of various RNA therapeutics (including mRNA, cRNA, and saRNA) with robust protein expression. When formulated in standard LNP compositions (50:38.5:10:1.5 molar ratio of ionizable lipid:cholesterol:DOPE:PEG-lipid), it demonstrates superior lung-specific targeting compared to commercial alternatives following intravenous administration, while maintaining an excellent safety profile.

Product information

CAS No.	Not available
Chemical Name	CP-LC-1074
Formula	C57H109N3O8S3
M.Wt	1,060.7
Purity	>98%
Storage	Original product: up to 1 year under the storage conditions stated on the vial, kept tightly sealed. Stock solutions: aliquots at -20°C, generally up to one month.
Shipping condition	Ships from Shanghai. Pure lipid is stable during ice-pack transport.

Formulation & study context

Literature values apply to the cited study only. Administration routes describe research, not clinical instructions.

A complete product-specific formulation has not been verified. No standard ratio is substituted.

N/P ratio	Not reported in the verified record
Cargo	Not available in the verified record
Administration route	Not available in the verified record
Animal model	Not available in the verified record
Formulation process	Not available in the verified record

N/P is a nitrogen-to-phosphate molar ratio. Lipid:cargo mass ratio is a different quantity and must not be used as N/P.

Stock-solution preparation table

Calculated using product-page MW: 1060.7 g/mol. Volumes are final solution volumes.

Mass	1 mM	5 mM	10 mM
10 mg	9.428 mL	1.886 mL	0.943 mL

Mass	1 mM	5 mM	10 mM
25 mg	23.569 mL	4.714 mL	2.357 mL
50 mg	47.139 mL	9.428 mL	4.714 mL
100 mg	94.277 mL	18.855 mL	9.428 mL
250 mg	235.693 mL	47.139 mL	23.569 mL

Volume (mL) = mass (mg) × 1000 / [MW (g/mol) × concentration (mM)]. Mathematical conversions only; not measured solubility. Confirm solvent compatibility and the exact material before preparation.

Handling & storage

Provided that storage conditions are as stated on the product vial and the vial is kept tightly sealed, the product can be stored for up to 1 year.

Wherever possible, prepare and use solutions on the same day. If stock solutions must be prepared in advance, store them as aliquots in tightly sealed vials at -20°C. Generally, these will be usable for up to one month.

Before use, and prior to opening the vial, allow the product to equilibrate to room temperature for at least 1 hour.
