

DC67472 | Hexa Lipid 114

Instructions for Use

Hexa lipid 114 represents a structural derivative of lipid 114, engineered as an ionizable cationic compound for enhanced nucleic acid delivery applications.

Product information

CAS No.	Not available
Chemical Name	Hexa Lipid 114
Formula	C112H218N4O12
M.Wt	1,813.0
Purity	>98%
Storage	Original product: up to 1 year under the storage conditions stated on the vial, kept tightly sealed. Stock solutions: aliquots at -20°C, generally up to one month.
Shipping condition	Ships from Shanghai. Pure lipid is stable during ice-pack transport.

Formulation & study context

Literature values apply to the cited study only. Administration routes describe research, not clinical instructions.

A complete product-specific formulation has not been verified. No standard ratio is substituted.

N/P ratio	Not reported in the verified record
Cargo	Not available in the verified record
Administration route	Not available in the verified record
Animal model	Not available in the verified record
Formulation process	Not available in the verified record

N/P is a nitrogen-to-phosphate molar ratio. Lipid:cargo mass ratio is a different quantity and must not be used as N/P.

Stock-solution preparation table

Calculated using product-page MW: 1813.0 g/mol. Volumes are final solution volumes.

Mass	1 mM	5 mM	10 mM
10 mg	5.516 mL	1.103 mL	0.552 mL
25 mg	13.789 mL	2.758 mL	1.379 mL
50 mg	27.579 mL	5.516 mL	2.758 mL

Mass	1 mM	5 mM	10 mM
100 mg	55.157 mL	11.031 mL	5.516 mL
250 mg	137.893 mL	27.579 mL	13.789 mL

Volume (mL) = mass (mg) × 1000 / [MW (g/mol) × concentration (mM)]. Mathematical conversions only; not measured solubility. Confirm solvent compatibility and the exact material before preparation.

Handling & storage

Provided that storage conditions are as stated on the product vial and the vial is kept tightly sealed, the product can be stored for up to 1 year.

Wherever possible, prepare and use solutions on the same day. If stock solutions must be prepared in advance, store them as aliquots in tightly sealed vials at -20°C. Generally, these will be usable for up to one month.

Before use, and prior to opening the vial, allow the product to equilibrate to room temperature for at least 1 hour.
